

## Staff Report

**TO:** City Council  
**FROM:** Jeff Hart, Director of Public Works  
**DATE** November 1, 2022  
**SUBJECT:** Development Impact Mitigation Fee Program Adjustments

---

**Description** Fiscal Year 2022-2023 Development Impact Mitigation Fee Program Adjustments Pursuant to Ordinances 1087, 1092, 1095 and Resolution 2017-23

### **Background and Analysis:**

On June 20, 2017, the City Council approved an amendment to the sewer capacity fee (Ordinance 1087 and Resolution 2017-23). On September 5, 2017, the City Council approved the establishment of the Local Transportation Facility Mitigation Fee Program (Ordinance 1092). On November 7, 2017, City Council approved the establishment of the 2017 Development Impact Mitigation Fee Program (Ordinance 1095).

The proposed development impact mitigation fee program appropriately apportions the costs of improvements needed to successfully mitigate the impact of new development on the local infrastructure, Beaumont parks, recreation, police, fire, and civic facilities. These facilities are critical in providing a high level of service and safety for the residents and people working within the City.

In order to fund projected costs of construction now, and into the future, the approved ordinances provide for annual adjustments to these development impact fees to keep pace with industry costs. These adjustments are to occur at the same rate that building and material costs change, either upward or downward. This rate of adjustment is calculated on the basis of changes to the appropriate cost index. This year, due to increased construction and material costs, the Building Cost Index (BCI) and the Construction Cost Index (CCI) have both increased. The sewer capacity fee ordinance adjustments are dependent on changes to the Consumer Price Index (CPI), which increased 9.2% over the past year.

Ordinances 1092 and 1095 contained a section which authorized automatic annual adjustments to each of the Development Impact Mitigation Fees (DIFs) by an amount equal to the cumulative percentage difference in the applicable BCI or CCI of the Engineering News Record Index published for the month nearest the effective date of

the adjustment. The annual fee revisions shall be calculated by the city manager, or her designee and shall be included in a report to the City Council.

Upon completion of the review, a 3.52% increase in the CCI was identified for the following fees:

- Traffic signals,
- Railroad crossings,
- Local streets and bridges (not covered by the WRCOG TUMF program),
- Community parks, and
- Neighborhood parks.

Upon completion of the review, a 6.27% increase in the BCI was identified for the following fees:

- Recreation facilities,
- Fire stations,
- Police station, and
- Public facilities.

Lastly, upon completion of the review, a 9.2% increase in CPI was identified for the following fees:

- Sewer capacity

The details of the adjustments, including the current fee, fee adjustments and percent change are provided in the attached tables with an effective date of January 1, 2023. (Attachment A and Attachment B).

## **Findings:**

Government Code Section 66001 requires that an agency establishing, increasing or imposing impact fees, must make findings to:

1. Identify the purpose of the fee: To provide for the funding of adequate public facilities to serve additional development.
2. Identify the use of the fee: To fund facilities identified with the study.
3. Determine that there is a reasonable relationship between:
  - a. The use of the fee and the development type on which it is imposed,
  - b. The need for the facility and the type of development on which the fee is imposed, and

- c. The amount of the fee and the facility cost attributable to the development project. (Applies when fees are imposed on a specific project.)

**Fiscal Impact:**

The cost to prepare this staff report is estimated to be \$750. There are no additional costs to the City; the impact fees will be utilized to construct facilities and improvements commensurate with the adopted nexus studies, Ordinances 1087, 1092, 1095, and Resolution 2017-23.

**Recommended Action:**

Receive and file.
