

Staff Report

TO: City Council

FROM: Thaxton Van Belle, Director of Water Reclamation
Sunshine Sanchez, Management Analyst

DATE June 17, 2025

SUBJECT: Follow-Up Report No. 7 – Local State of Emergency – Sewer Mainline Failure and Emergency Repairs in Fairway Canyon

Description City is retroactively pursuing environmental permits due to local emergency caused by the sewer mainline failure in Fairway Canyon.

Background and Analysis:

On March 3, 2025, City staff were notified of a major sewer mainline failure in the Fairway Canyon community caused by slope erosion behind Hogan Drive homes. The incident led to a manhole collapse and a subsequent 15-inch sewer mainline failure, resulting in a raw sewage spill and the need for emergency response measures.

On March 4, 2025, the City Council adopted a Resolution titled, “A Resolution Of The City Council Of The City Of Beaumont Declaring A Local Emergency And Authorizing The City Manager To Take Necessary Action”, which authorized emergency expenditures in an amount not to exceed \$500,000, directed staff to provide ongoing reports at each subsequent City Council meeting under California Public Contract Code Section 22050, and authorized the City Manager to take all necessary actions to mitigate further damage and ensure public health and safety.

On March 18, 2025, staff brought a follow-up status report regarding the emergency repairs in Fairway Canyon. No action was taken, but updated pictures were provided, along with an estimated amount of \$21,000 that had been expended.

On April 1, 2025, staff brought a follow-up status report regarding the emergency repairs in Fairway Canyon. The full financial impact to date was \$432,101, including requisitions added and costs on bypass pumping, equipment and fuel. Staff were approved for an additional \$500,000, increasing the total allocation to \$1,000,000 to cover the costs for repairs.

On April 15, 2025, staff provided a follow-up regarding the emergency repairs in Fairway Canyon, which included construction progress updates with pictures and expenditures paid to date.

On May 6, 2025, staff provided an update on construction activity with pictures of completed items.

On June 3, 2025, the City Council re-ratified the Local Emergency Declaration through a second resolution.

On the recommendation of legal counsel, the emergency status remains open while the City pursues environmental permits retroactively.

The costs are displayed in the table below:

Expenditures as of May 30, 2025	Encumbered	Amount Spent
Fuel for bypass pumps	\$ 2,346.00	\$ 7,035.00
Miscellaneous equipment	\$ 1,294.00	\$ 2,590.00
Electrical	\$ 8,627.00	\$ 8,627.00
Charles King (Bypass pumps)	\$ 40,000.00	\$ 23,552.00
Weaver Grading	\$ 389,500.00	\$ 354,500.00
Legal Services	\$ -	\$ 30,995.00
Total	\$ 441,767.00	\$ 427,299.00

Fiscal Impact:

All emergency-related costs were paid from the Wastewater contingency account. Although this account has exceeded its budget, Wastewater Fund revenues are tracking higher than anticipated, therefore no reserve funds will be required. Overall, the Wastewater Fund remains within its total appropriated budget.

The estimated cost to prepare this staff report is \$150.

Recommended Action:

Direct staff to return at the next Council meeting with a follow-up report on environmental permits.
