It shall be understood that the Contractor will be required to perform and complete the proposed weed abatement services work in a thorough and professional manner, and to provide labor, tools, equipment, traffic control, materials and supplies necessary to complete all the work in a timely manner that will meet the City's requirements.

Contractor may be required to perform the following weed abatement activities throughout the City as outlined in BMC 8.08.015-Property Maintenance Standards. Methods of cleaning properties include disking, hand labor, and mowing:

Contractor Duties and Responsibilities

- Properties one acre or less: Mowing is acceptable on properties less than an acre. Parcels shall be mowed to a 3-inch-high stubble.
- Properties more than 1 acre, and less than 5 acres: Parcels of five acres or less in size shall be mowed to a three-inch-high stubble, or disked provided that such disking does not create fugitive dust emissions in violation of state air quality rules and that the owner takes all steps necessary to control fugitive dust emissions;
- Properties 5 acres or more: Parcels larger than five acres in size shall be mowed to a three inch-high stubble, or disked around the perimeter of the parcel in a swath 100 feet wide and with a 100 foot wide "crisscross" through the center of the parcel provided that such disking does not create fugitive dust emissions in violation of state air quality rules and that the owner takes all steps necessary to control fugitive dust emissions.

The contractor is responsible for ensuring that all parcels, regardless of size, are properly cleared of weeds and overgrown vegetation. Certain areas may require handwork due to terrain, proximity to structures, or other environmental constraints that prevent the use of mechanical equipment.

It is the contractor's sole responsibility to assess each parcel and include the necessary labor, tools, and techniques required to achieve full compliance with the City's weed abatement standards. Failure to account for handwork in the proposal will not be considered a valid reason for incomplete or delayed work. The contractor must ensure that all designated areas are properly maintained in accordance with the specifications outlined in this RFP.

Special Considerations

It has caused widespread damage to native plant communities and ecosystems and has rendered pockets of rangeland useless. It should be removed whenever possible to prevent further infestations. The plant stands 1-2m in height and can be identified by

large spiny leaves that form a rosette pattern. It displays large flowering heads with showy purple disk flowers.

Flammable waste, such as tree limbs, or other vegetation, within the parcel number identified under this RFP shall be removed.

All cleared, thinned, or cut materials must be removed from the property to an approved county landfill site or green waste facility for proper disposal.
