E. Work Plan

Approach

SCG's approach to providing consulting services is to establish a strong working relationship built on trust and confidence in our abilities. We accomplish this by consistently delivering a high quality and accurate work product, provide City Staff with manager level support, and demonstrate a strong understanding of the City's Districts and economic needs.

Our team has successfully transitioned this work on multiple occasions and has established a process that will have virtually no impact on City Staff. Throughout the entire process, we will continue to monitor the schedule, communicate with the City, conduct the initial audit, prepare the levy for submittal, and coordinate the preparation of reports while adhering to our internal quality control procedures. Our guiding principles include: effective communication, timely coordination, quality assurance, qualified experience, and comprehensive service.

SCG offers all-inclusive Annual Administration Services, Special Tax Consulting Services, and Annual Financial Reporting Services that are factored into both our scope of work and the estimated costs to provide these services. SCG provides a comprehensive approach to these services managing every step including but not limited to the below:

Kick-off Meeting – SCG will schedule a Kickoff Meeting beginning each March with City Staff. At that meeting, we will establish the appropriate lines of communication and provide a detailed timeline that includes all milestones, party responsibilities and deliverables.

Budgeting and Reporting – SCG will coordinate a meeting with the various departments to discuss the City budget and the discrete components of each District. SCG will provide a framework of the budgets for the various Districts to be completed, and provide drafts reporting to review for form and content. SCG will be in communication with City Staff to complete the Annual Reports and all Municipal Disclosure Reporting.

Levy Calculation - Using SCG resources, we will review the secured roll parcel data and communicate any changes to City Staff as new development occurs, and upon approval from City Council submit the levies to the County Auditor's Office on or before the August deadline.

To assure and maintain **quality assurance**, SCG instituted an internal audit and review protocol that requires a minimum of three reviews of any deliverable product. It is our goal to provide these deliverables ahead of the deadline to allow City Staff sufficient time to review and approve. Specifically, the annual levy enrollment process requires an acute attention to detail in order to manage thousands of records and ensure accuracy. A significant function of our annual levy quality assurance is the use of our annual Levy Audit Maps utilizing GIS technology.

“Do it right the first time”. A three level review of ALL our products and deliverables are incorporated to identify potential errors and avoid costly and time consuming mistakes.

Work Statement

As previously stated, SCG specializes in Formation, Bond Issuance, and Administration services to local agencies with Districts. Upon award of the contract, SCG will begin immediately transitioning the information/documentation, recreating the prior year's levy and performing an audit of the Special Districts to insure the work transfer is complete, with little impact to City Staff. Once SCG has obtained the necessary information, SCG will schedule a meeting to review the annual levy process with City Staff. At that meeting we will establish the appropriate lines of communication and provide a detailed timeline that includes all milestones, party responsibilities and deliverables.

SCG will provide a framework of the budgets for the various Districts to be completed, drafts of Staff Reports, and Resolutions to review for form and content. SCG will be in communication with City Staff to complete the budgets, Disclosure Reports, and add any new information relevant to the current year's levy including new zones anticipated to receive services. Using SCG resources we will review the secured roll parcel data and communicate any changes to City Staff as new development occurs. SCG will coordinate the completion of Staff Reports, Resolutions, Map Exhibits, and other agenda items with City Staff and the City Attorney for City Council meetings. SCG will attend the meetings and upon approval from City Council submit the levies to the County Auditor's Office by the August deadline.

SCG is staffed with seasoned professionals who provide our clients with the best possible results. The SCG staff is fully knowledgeable with all changes to laws, codes, and regulations affecting local governments such as the recent enhanced disclosure requirements of AB 2109, AB 1666, and SB 1029. Our team has the reputation of working with our clients as partners by developing an intimate knowledge of their needs and responding with strategic and timely solutions. While working with the City of Beaumont, our project managers have worked well as a contributing member of the City's finance team.

It is our experience that given the economic difficulties many public agencies continue to realize City Staff does not have the time or manpower to do things more than once. SCG provides the **senior level experience** that is key to avoiding mistakes, insuring timely delivery, and truly acting as an extension of staff.

SCG possesses a **strong understanding** of the City's goals and policies and all aspects associated with each of the City's Districts. Often times these funds are critical to the City's ability to provide a quality service to the community. SCG has extensive experience working with the Riverside County Auditor/Controller's Office, and the Riverside County Assessor's Office and Tax Collector and has direct access to real-time tax information through the County's database system. This experience and our prior working relationship allows us to have a deep appreciation and understanding of the City's Districts.

Given the unique challenges facing the City regarding its Districts SCG has taken great consideration in determining the best way to serve your community. We will provide the highest level of professionalism and transparency regarding the Annual Financial Reporting Services. We believe you will find that this team possesses a unique understanding of the City's

financial situation and operational challenges and will be able to add a level of review and transparency relating specifically to these services.

Technological Support

STAX It is our goal to provide these deliverables ahead of the deadline to allow City Staff sufficient time to review and approve. Specifically, the annual levy enrollment process requires an acute attention to detail in order to manage thousands of records and ensure accuracy. SCG has invested in the development of our proprietary software system named Spicer TAX System (STAX). This software solution uses a SQL Server database structure that allows us to maintain large amounts of data and provide current and historical property information to our associates. We rely on this system to provide various detailed and summary report information to our team. STAX allows our associates to manage property owner call logs, annual levy calculations, annual budget information, annual levy submittals, delinquency detail and summary information, debt services schedules, and agency summary information for the Special Districts we administer.

GIS Platform and Mapping Another significant function of our annual levy quality assurance is the use of our annual Levy Audit Maps utilizing GIS technology. Our Project Managers were the first in the industry to utilize GIS as a tool for auditing the annual levy process. SCG has integrated GIS auditing into the annual levy process and provides its clients with both data files and mapping files that can be loaded on the agencies GIS platform for reference. See Attachment A for a sample GIS map of the City's CFDs.
